We are pleased to introduce you our feed additive product.

Monocalcium Phosphate Feed Grade

MCP is used as a feed additive for livestock and poultry which contains calcium and phosphorus from inorganic compounds, namely orthophosphorus acid and finely ground calcium carbonate. MCP facilitates the metabolism of livestock and poultry, strengthening their immune and reproductive systems, creates better digestibility and ensures that the organism is saturated with the calcium.

Chemical name:	Monocalcium Phosphate
CAS/EINECS number:	10031-30-8/231-837-1
Chemical formula:	Ca(H₂PO₄)₂×H₂O
Custom code (TARIC):	28352600
